Message from the Guest Editors

Dear Colleagues,

The main task of fiscal policy is to influence the economy through government spending and taxation. In economic theory, there are three main analytical frameworks that affect fiscal policy and economic growth—neoclassical growth models, endogenous growth theory, and literature emphasizing institutional conditions. Recently, the emphasis has been on developing a comprehensive human-centred model that plays a central role in the transition to sustainable development and emphasizes the role of fiscal policy and public policy reforms under conditions of growing uncertainty, inequality, and climate change. Therefore, this Special Issue focuses on both theoretical and empirical analyses of fiscal policy in addition to economic growth in the context of sustainable development.

The aim of this Special Issue is to bring together theoretical, review, and empirical concepts that help define the perspective of fiscal policy as well as economic growth based on an integrated set of economic, social, environmental, and ethical rights-based principles.

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, EconBiz, EconLit, RePEc, and other databases.

Journal Rank: CiteScore - Q1 (Business, Management and Accounting (miscellaneous))
