Message from the Guest Editors

Dear Colleagues,

With advances in technology, traditional banking services are increasingly being offered digitally. Digital banking obviates the need for physical presence or brick-and-mortar banking. Financial technology, or fintech for short, refers to the delivery of financial services using innovative technologies. Buy-Now-Pay-Later services, for example, allow users to shop around and pay back later in interest-free instalments. Both digital banking and fintech are revolutionizing the financial services world. This Special Issue brings together papers that document the state-of-art in these areas. Research papers documenting theoretical and empirical research on how digital banking and fintech are shaping financial services are welcome.
