submissions:

closed (31 March 2023)

Message from the Guest Editor

Corporate finance is a rapidly growing field in today's globally integrated economic and financial environment. A corporation is a very complex unit, with its multiple dimensions dealing with legal issues, taxation, efficiency, debt, equity, bankruptcy, accounting, financial statements, governance, securitization, time value, derivatives, and leases.

Today's financial world has a significantly heterogeneous structure. On one side, researchers study the advanced financial markets with dominating exchanges and well-studied characteristics; on the other side, emerging markets shine as an alternative focusing point and attract researchers with their intriguing characteristics. Yet, another alternative, frontier markets, stand out as having even more intriguing characteristics.

Within this context, the Special Issue looks for theoretical, empirical, or methodological articles on corporate structure, valuation, firm-specific risk premiums, CEO compensation, stakeholders' perceptions, managerial influence, hybrid financing, financial systems, regulation, finance and innovation, consumer finance, emerging markets, and sustainable finance.
