Deadline for manuscript submissions:

closed (31 May 2022)

Message from the Guest Editors

The coronavirus 2019 pandemic has had a devastating impact on the global economy, resulting in the collapse of financial markets, borders closing, and travel suspension across the world. It is thus indubitably the right time for us to review the effect of infectious disease outbreaks on our societies, markets, and firms. At the same time, it is critical to investigate the consequences of uncertainties created from the outbreaks and other sources in financial markets and firms. These will provide us with lessons to better prepare for potential risks in the future.

This Special Issue invites submissions related to the impact of all infectious disease outbreaks on financial markets and firms. It also calls for submissions related to the impact of different uncertainties on financial markets and firms.
