Message from the Guest Editor

During the last three decades, sustainable development, with its three aspects—economic, social, and environmental—has become an important factor in trying to influence the everyday lives of future generations for the better. The importance of sustainable development for achieving economic growth is partly the responsibility of the government to direct its policies and programs to achieve all three aspects of sustainable growth. Businesses can follow the policy and its guidelines. Enterprises need to develop a culture of sustainable organizational models to achieve a competitive advantage. Sustainable development guidelines can bring new added value to enterprises. The focus is on the economic aspect of sustainable development. The social aspect of sustainable development can be presented through the social responsibility of the enterprise and the definition of an international standard that speaks of social responsibility. The third aspect is to clarify the environmental importance of sustainable growth.

an Open Access Journal by MDPI
