Message from the Guest Editor

This Special Issue focuses on the broad topic of “Sustainable Finance: Environmental, Social, and Corporate Governance Sustainability.” The increased adoption of environmental, social, and corporate governance sustainability (ESG) goals by corporations, financial institutions, and regulators has inevitable impacts on financial institutions, asset markets, and financial stability and regulation.

We welcome theoretical and empirical articles on any aspect of the interplay between each of the three sustainability pillars and financial sector developments and innovation. Areas of interest include but are not limited to the following:

- **Environmental (E):** “green” financial instruments and investment strategies, evaluating, and pricing of climate-related risks, climate-related financial disclosure;
- **Social (S):** policies, strategies, and innovations to improve financial inclusion worldwide;
- **Governance (G):** diversity, equity, and inclusion in the financial industry and financial regulation.
