**closed (10 August 2024)**

### Message from the Guest Editors

Dear Colleagues,

This Special Issue focuses on the broad topic of “Economic Policy Uncertainty” (EPU) and its impact on financial markets. Uncertainty creates both opportunities and poses risks to financial markets. EPU emphasizes the uncertainty generated by economy-related policies, and has gathered significant attention. It has the potential to amplify and propagate the effects of substantial negative shocks (Baker et al. 2016). Financial markets face uncertainty from various sources, among which EPU has been a critical one.

The aim of this Special Issue is to explore the potential influence of EPU on the performance of financial markets. Areas of interest include, but are not limited to, the following: the connectedness between EPU and financial markets, the price volatility of financial assets, investment returns and risks, and climate change. Submissions addressing the intersection of EPU and FinTech (e.g., cryptocurrency, blockchain technologies) are particularly encouraged.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, EconBiz, EconLit, RePEc, and other databases.

**Journal Rank:** CiteScore - Q1 (Business, Management and Accounting (miscellaneous))
