University, 221 Burwood Hwy,
Burwood, VIC 3125, Australia

Deadline for manuscript
submissions:

31 December 2024

Message from the Guest Editor

This Special Issue is dedicated to exploring the interplay between credit and liquidity in shaping bank earnings and profitability, the effects of new capital requirements on the banking sector, and the influence of large language models and AI on banking efficiency. The objective is to provide insights into the immediate impacts of these significant challenges on the banking sector and propose policy measures that central banks worldwide could employ to mitigate these effects. We encourage the use of state-of-the-art econometric, mathematical, statistical, and machine-learning methods to address these issues, drawing from both theoretical and empirical approaches.
