Deadline for manuscript
submissions:

closed (30 June 2019)

Message from the Guest Editor

This Special Issue is concerned with the econometric analysis of financial data, both methodological and applied. The prevalence of large financial data sets and real time updates have opened up new developments in the area of financial econometrics. This issue welcomes studies on aspects of volatility modelling, large dimension financial data, high-frequency trading and data analysis, forecasting of asset returns, financial bubbles and contagion, financial engineering, nonlinear financial time series analysis, long memory time series, and analysis of tail risks and extreme events. Papers for this issue may focus on the econometric study of new financial markets, new financial products and frontier development of econometric methods for financial data.

Indexing & Abstracting Services:

Indexed in the Emerging Sources Citation Index (ESCI - Web of Science), EconLit, RePEc, DOAJ and others.

Advantages:

- Open Access
- Thorough peer review
- Fast manuscript handling time (submission to 1st decision within 24 days; acceptance to publication within 7 days)
