Message from the Guest Editors

Dear Colleagues,

For this Special Issue, we are seeking papers, both theoretical and empirical, that address challenges to the financial system after the COVID-19 crisis. To what extent can we expect problems with respect to nonperforming loans (NPLs) in the banking system, notably in Europe and the US? Are we heading towards a new sovereign debt crisis, especially in the eurozone? Are high valuations on global equity markets sustainable, or are we heading towards a stock market crash? Do we observe underpricing of risk on financial markets? What are the consequences of accelerating digitalization due to COVID-19 for the competitive landscape of financial services and securities markets? How does artificial intelligence play a role in this process?
