Message from the Guest Editor

Dear Colleagues,

This Special Issue focuses on the broad topic of “Insurance Economics and Finance”. We encourage contributions across the breadth of research in insurance including:

- Theoretical and empirical work on the design and development of insurance products and markets for life and non-life insurance. Empirical studies of both general and specific types of insurance are of interest. Methodologically, traditional as well as novel behavioural and experimental approaches are of interest.
- Market failure and insurance coverage including insights for regulation and public provision of coverage.
- The role of insurance in corporate risk management.
- Developments in risk transfer in insurance and reinsurance.
- The role of insurance in managing climate risks, including the design of insurance products and regulation to ensure the effective management and mitigation of these risks.
- The role of insurance in managing major health and environmental risks.
- Business interruption insurance and the insurance of non-communicable diseases.
- The access and provision of private and public medical insurance.
