Special Issue

Financial Technologies (Fintech) in Finance and Economics

Message from the Guest Editor

This Special Issue focuses on "*Financial Technologies (Fintech) in Finance and Economics*". Financial technology (Fintech) is one of the most disruptive innovations in IT and finance. Fintech nurtures new business models, products, and services, aiming to improve the efficiency of the financial services industry through modern IT. Artificial intelligence (AI), machine learning (ML), deep learning, big data, cloud computing, and blockchain play key roles in fintech. This Special Issue calls for papers on emerging information technologies in finance and economics. It welcomes research articles that present novel theory, algorithms, systems, and applications of financial information technologies, and encourages submissions from multiple disciplines, including statistics, computer science, information systems, finance, etc. Topics of interest include, but are not limited to, AI in finance, ML in finance, big data in finance, cloud computing in finance, algorithmic trading, smart trading strategies, robo-advisors, blockchain, cryptocurrency, token economics, digital economics, etc.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management* (*JRFM*), an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
