

## Special Issue

# Innovation in Business and Energy Systems

### Message from the Guest Editor

This Special Issue focuses on the broad topic of “Innovation in Business and Energy Systems”. As energy is in everything, to achieve some degree of focus, the Special Issue will be anchored on the role of business in energy transitions. Hence, research addressing a broad array of topics would include novel challenges to conventional energy systems and public policies, the framing and analysis of transition paths to alternative energy futures, the economic assessment of proved energy technologies that have yet to have been commercialized, the risks and opportunities associated with matching energy systems to a variety of geographical and political contexts, as well as recasting the decision calculus of the so-called “non-energy” firm to include energy consequences of its choices, for example.

## About the Journal

### Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
