submissions:

closed (1 November 2023)

Message from the Guest Editors

The goal of this Special Issue is to collect papers (original research articles and review papers) to give insights about to give insights on the relationship between the conservation of the dune profile both on land and at sea and coastal dynamics, so as to direct the conservation actions of the coast towards greater naturalness.

This Special Issue will welcome manuscripts that link the following themes:

- Modification of dune habitats due to anthropic pressures;
- Coastal erosion and loss of marine and coastal habitats;
- Importance of seagrass meadows;
- Coastal dynamics and climate change;
- Dune biodiversity and restoration;
- Sandbanks and seagrass meadows biodiversity and restoration;
- Management and conservation of marine/coastal habitats and species.

We look forward to receiving your original research articles and reviews.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
