### Message from the Guest Editors

For this Special Issue, we invite submissions that explore processes of agroecological transition to inform practices and policies and, ultimately, contribute to out/upscaling agroecological experiences.

- Collective experiences of farm management, system design, and use of natural resources developed with farmers.
- Assessment of unknown or undervalued agroecosystem services.
- Interaction strategies between producers and consumers for the exchange of environmental goods and services.
- Social and/or technological agroecological innovations in rural–urban contexts.
- Multi-stakeholder participatory initiatives (production, consumption, food, health).
- Transdisciplinary analysis of resilience and sustainability of agroecological systems.

## Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
