### Message from the Guest Editors

The perception of landscape has been advanced by incorporating various technologies such as 3D scanning, physio-psychological measurements. The advancement is not limited to new technologies; new approaches such as point cloud data analysis and machine learning techniques all enhance the methodology of landscape perception studies.

This Special Issue will welcome manuscripts that link the following themes:

- Digital landscape technologies and perceptions ;
- Psychological instruments and physiological studies for measuring landscape perception ;
- The application of neurosciences in the landscape studies ;
- Big data analysis of green space use and perception ;
- Machine learning techniques to understand people's perception, comfort and satisfaction in different landscape contexts.

We look forward to receiving your original research articles and reviews.
