Understanding Disasters in a Changing Landscape: Causes, Impacts and Mitigation Strategies

Guest Editors:

Prof. Dr. Fotis Maris

Prof. Dr. Panagiotis Angelidis

Dr. George Papaioannou

Deadline for manuscript submissions:

15 March 2025

Message from the Guest Editors

This Special Issue invites contributions that delve into the multifaceted realm of land-related disasters and their aftermath. We are increasingly seeing climate or human-driven changes in land cover or land uses, which are often accompanied by risks that are difficult to predict, model, assess in terms of their complex impacts, and mitigate.

This call encourages interdisciplinary research, from fields such as environmental science, geography, geology, engineering, and urban planning. We invite scholars, researchers, and practitioners to contribute their insights, methodologies, and innovative solutions to foster a deeper understanding of the broader spectrum of land-related disasters and promote resilient communities. A cross-disciplinary, geographically extended, and gender-balanced group of experts will be invited to contribute to this novel call, with papers related to the improved understanding of land-related changes and their subsequent natural hazards, in terms of modelling, new technologies and applications, management, impact assessment, risk evaluation, mitigation strategies, and state-of-the-art advances in the recent literature.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
