Message from the Guest Editors

The goal of this Special Issue is to collect papers (original research articles and review papers) in order to develop insights whether it is possible, even in disruptive, disruptive, or dysfunctional contexts, to combine appropriate responses in regional, metropolitan, or urban contexts, with the maintenance or reformulation of broader visions over time, focused on the sustainable development of communities, economy, and territories.

This integrated, transversal, and prospective view of the territory is one of *Land's* objectives, which this Special Issue aims to emphasize.

This Special Issue will welcome manuscripts that link strategic planning with themes including (but not limited to) the following:

- Resilient cities;
- Public participation;
- Strategic spatial planning;
- Land use;
- Spatial planning;
- Public space evaluation;
- Strategic urbanism;
- Stakeholders' analysis;
- Multilevel governance;
- Regional governance;
- Urban governance;
- Urban development;
- Geographic information systems (GIS)
