## Ecosystem Services and Residents' Perceptions: Integrating and Innovating across Disciplinary Perspectives

Guest Editors:

**Prof. Dr. Qi Fu**

**Prof. Dr. Hans Skov-Petersen**

**Dr. Xu Bi**

**Dr. Kai Li**

Deadline for manuscript  
submissions:

**31 December 2024**

### Message from the Guest Editors

Dear Colleagues,

As global environmental changes and socio-economic development progress, the study of ecosystem services (ESSs) has become a focal point across multiple disciplines such as environmental science, geography, urban planning, and social sciences. Ecosystem services, the contributions of ecosystems to human well-being, encompass provisioning, regulating, cultural, and supporting services. However, the value of ecosystem services depends not only on their biophysical attributes but also on the social, cultural, and economic contexts, particularly the perceptions and evaluations of these services by residents. Therefore, exploring the relationship between ecosystem services and resident perception is of great significance for promoting the sustainable management and utilization of ecosystem services.

This Special Issue aims to gather research from diverse disciplinary backgrounds to discuss the interplay between ecosystem services and residents' perceptions, as well as how interdisciplinary approaches can foster the integration and innovation of ecosystem services.

We look forward to your contributions!

## Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
