Deadline for manuscript submissions:

23 October 2024

Message from the Guest Editors

This special issue focuses on how recent processes of globalization modify socio-economic organization and land use in rural areas, both in those integrated into periurban and metropolitan areas and in deep and remote rural spaces, at the local and regional territorial level.

Recent rural dynamics have been characterized mainly by several interrelated trends: deagrarianization, economic and cultural diversification, population changes, and increased mobility. Although these modifications are common to all rural areas, the way in which they are produced, and the effects vary greatly from one territory to another depending on different socio-economic, infrastructural, and cultural circumstances.

These changes affect areas between the countryside and the city where intensive processes of rural urbanization, suburbanization and peri-urbanization are taking place, but also, although in different ways, rural areas that are more distant and less connected to urban spaces.

We kindly invite papers linking the aspects mentioned above. Contributions to this Special Issue could serve to provide some useful answers for the implementation of land and landscape planning projects.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
