Message from the Guest Editor

Dear Colleagues,

The aim of this Special Issue is to examine the origin, nature, and consequences that affect the state of conservation of coastal landscapes in depth, as well as the possibility of developing protocols for action that can significantly contribute to their conservation.

Original research papers may focus on topics including, but not limited to, the following:

- Analysis of cases of degradation of coastal ecosystems: cliffs, dunes, marshes, lagoons, mangroves, etc.
- Proposals for monitoring the state of conservation of coastal landscapes at the local, regional, or global levels.
- Methodological proposals aimed at improving the conservation status of coastal landscapes.
- Analysis of the causes and consequences of recent transformations in the landscapes of different coastal areas around the world.
- Coastal landscapes, human activity, and conservation. Landscape remote sensing data processing.

land

an Open Access Journal by MDPI

Editor-in-Chief

Landscape Development,
Institute for Geosciences and
Geography, University of Halle,
Halle, Germany

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
