### Message from the Guest Editors

Dear Colleagues,

Following the success of the Special Issue of *Land* on the "Effects of the COVID-19 Pandemic on the Use and Perception of Urban Green Space", we are happy to announce the opening of a second volume of this thematic Special Issue.

The aim of this ongoing Special Issue is to collect further studies on how the need, perception and usage of green spaces have changed in the wake of the pandemic, and to shed light on how administrators and policy makers can confront the environmental, biological, and social threats that have arisen. It is our hope that by encouraging a communal discussion on the planning and management of urban green spaces, we can increase the resilience of both our cities and the natural environment on which they depend.
