submissions:

closed (29 March 2022)

Message from the Guest Editors

Sustainable development is a perpetual topic accompanying human society. As a basic guarantee for human survival, land is facing the double dilemma of “resource shortage” and “extensive utilization”. In most urban areas of the world, intensive land development and construction activities have broken the red line of arable land protection, and “competitive conflicts” between economic development and ecological security have intensified. In the face of the global spread of COVID-19 as well as the food crisis and resource supply and environmental pollution that have occurred in cities in recent years, how to promote the high-quality, sustainable, and intelligent development of cities by improving the efficiency of land use and changing the way of land use is the key issue that needs to be focused on in the future.

In focusing on the efficient use of land resources and sustainable urban development, this Special Issue attempts to explore cases and experiences in promoting regional sustainable development through academic discussion.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
