### Message from the Guest Editors

The built environment and resultant behaviors of people are key determinants of the social, economic, and environmental sustainability of a city. The policy interventions for promoting walking and the pedestrian-friendly urban built environment is undoubtedly a crucial success factor for streets, neighborhoods, and cities.

Thus, the built environment and the resulting pedestrian behaviors are not only traditional research topics in planning, urban design, and transportation, but are also receiving considerable attention in sociology, public health, environmental science, and many other disciplines.

This Special Issue focuses on the analysis of the relationship between built environment, pedestrian behaviors, and urban social, economic, and environmental sustainability.

Deadline for manuscript submissions:

**closed (31 May 2024)**

an Open Access Journal by MDPI

## Editor-in-Chief

## Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
