Deadline for manuscript
submissions:
closed (30 June 2023)

Message from the Guest Editors

The epidemic situation of 2020 forces us to rethink the concept of green areas as places where people can stay safely. For this reason, the primary planning dilemma has returned: a concentration of leisure and recreation in large spatial forms (the idea of central parks) or the dispersion of relatively smaller individual areas (estate and inter-estate parks, rural parks)?

For this Special Issue, we invite you to submit a paper that focuses on one or more of the following topics:

- spatial planning at local and regional levels in the context of sustainable development and spatial order;
- location and construction of municipal green areas according to spatial planning procedures;
- parks and urban forests as valuable constructed forms of greenery;
- parks in reclaimed post-industrial areas;
- functions of constructed green areas; and
- green areas as a necessary element of land in times of natural disasters.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
