Land Degradation in Environmentally Sensitive Areas (ESA) : Assessment and Conservation

Guest Editors:

Dr. Mario Al Sayah

National Council for Scientific Research, Remote Sensing Center, Beirut 11-8281, Lebanon

Dr. Rita Der Sarkissian

LAB'URBA, University of Gustave Eiffel, University of Paris Est Creteil, Ecole des Ingénieurs de la Ville de Paris (EIVP), F-77454 Marne-la-Vallée, France

Dr. Rachid Nedjâi

Centre D'études et de Développement des Territoires et de l'Environnement, Université d'Orléans, 45100 Orléans, France

Deadline for manuscript submissions:

closed (15 September 2024)

Message from the Guest Editors

The journal *Land* presents this Special Issue entitled “Land Degradation in Environmentally Sensitive Areas (ESA): Assessment and Conservation”. Specific topics include, but are not limited to:

- Land degradation assessment methods (remote sensing, in situ, modeling, etc.);
- Investigating the extent of land degradation in ESA using a multitude of methods;
- The effect of external stressors such as land use change, natural hazards and human-made hazards on land degradation in ESAs;
- The ESA–land degradation–SDG nexus;
- Assessment of physical and/or chemical and/or biological land degradation in ESAs;
- Advances in land degradation mapping and characterization;
- Biophysical and socioeconomic implications of land degradation in ESAs;
- The potential of the land degradation neutrality (LDN) concept for combatting land degradation in ESAs;
- Conservation measures in ESAs for combating land degradation and linkages with nature-based solutions;
- ESA governance systems related to land conservation.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
