Message from the Guest Editors

We invite you to contribute articles to this Special Issue by reporting developed studies and new data about environment assessment using multi-disciplinary approaches. This Special Issue will assemble research that presents innovative methods, novel data analysis, application case studies, and insights that can improve our understanding of land-environment assessment using physical, geological, engineering, ecological, as well as economic evaluation for sustainable land use.

We welcome both original research and review papers focusing on, but not limited to, the following topics:

- The protection, management, and conservation of natural areas;
- Climate change impacts assessment;
- Relative sea level rise and economical sustainability of coastal areas;
- Geographic Information Systems (GISs);
- Integrated approaches to ecosystem valuation;
- Ecosystem services evaluation;
- Integrated tools for land management;
- Revealed and stated preference techniques.
