Environmental Impacts Brought by Climate Change and Urban Development in Cities

Guest Editor:

Dr. Harry F. Lee

Department of Geography and
Resource Management, The
Chinese University of Hong Kong,
Hong Kong, China

Deadline for manuscript
submissions:

closed (31 January 2024)

Message from the Guest Editor

This Special Issue will serve as an interdisciplinary platform for urban study. Scholars from various disciplines may use methods ranging from field research, questionnaire surveys, statistics, remote sensing, geographical information systems, computer modeling, and so on to systematically analyze the effects of climate change and urban development on the physical environments in cities.

This Special Issue will publish original research articles and review articles that help to identify possible future research directions. Topics of interest include, but are not limited to, the following:

- How and to what extent urban environments are affected by climate change or human activities;
- The use of big and open data in investigating urban environmental problems;
- In-depth case studies illustrating the environmental problems in cities;
- Urban planning in response to environmental problems;
- Methodological advancement in tracking and tracing urban environmental problems.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
