### Message from the Guest Editors

Dear Colleagues,

We are pleased to announce a Special Issue of *Land* on “New Insights in Integrated Land Management”.

For this Special Issue, we are interested in contributions that link land management strategies with information-based decision making, good practices and different decision-making models at different levels. The focus of the papers may relate to—but are not limited to—the following themes:

- Modern approaches to land consolidation, e.g., multi-purpose land consolidation, including the re-allocation of parcels together with a broad range of other measures which contribute to rural development.
- Landscape aspects in land consolidation procedures: valuation of different economic, social and environmental aspects.
- Land consolidation in urban areas: urban restructuring and/or urban renewal evaluation models.
- Assessments and technical aspects of land and property valuation in land consolidation.
