

Land Planning and Urban Regeneration for Achieving Sustainable Development: 2nd Edition

Guest Editors:

Prof. Dr. Pasquale De Toro

Dr. Francesca Nocca

Dr. Martina Bosone

Dr. Francesca Buglione

Deadline for manuscript
submissions:

31 December 2024

Message from the Guest Editors

The aim of this Special Issue is to investigate the contribution of cultural heritage and landscape to the achievement of sustainable development goals, also considering the current challenges that are changing the common vision about them (also in terms of use, accessibility, etc.).

Considering the multiplicity of values and stakeholders involved in the cultural heritage and landscape conservation and regeneration processes, the produced impacts require adequate evaluation tools, such as multicriteria evaluation methods. The complexity of cultural heritage and landscape conservation and regeneration processes implies an interpretation of evaluation as a dynamic process.

On the basis of the above, contributions from the scientific community are welcome on issues related to the role of cultural heritage and landscape in sustainable development processes, also focusing on the implications on land planning ones, with particular reference to:

- Urban regeneration and land planning;
- Cultural heritage and landscape conservation and regeneration;
- Multicriteria evaluation;
- Sustainable cultural tourism;
- Digitalization and innovative technologies for cultural heritage.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
