Modeling to Innovate Planning Solutions for Socioecological Systems: The Resilience Approach

Guest Editors:

Prof. Antonio Leone

Full Professor in Urban and Regional Planning, Dipartimento di Ingegneria dell'Innovazione, Università del Salento, Lecce - Monteroni - LECCE (LE), Piazza Tancredi, 7, 73100 Lecce LE, Italy

Prof. Dr. Angioletta Voghera

Urban and Regional Planning, DIST, Interuniversity Department of Regional and Urban Studies and Planning, 10125 Torino, Italy

Deadline for manuscript submissions:

closed (15 July 2021)

Message from the Guest Editors

In this thematic Special Issue it is stressed the resilience theme into planning processes, which is a relatively new theme, especially if we consider the consolidated planning praxis. Nevertheless, there are clear parallels between the evolutionary concept of resilience and planning, as a complex process and interconnected system of strategies and actions. Resilience is a widely recognized concept, that has been applied to research and practice in nearly every possible scientific area. Keeping track of its general definition (capacity of the system to develop without significant alteration of its intrinsic characteristics), the resilience concept has to be applied to dynamic systems such as territory and landscape. In those fields resilience can be conjugated in terms of carrying capacity of human action by ecosystems.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
