Land Management at Urban-Rural Interface

Guest Editor:

Dr. Fabrizio Battisti

Department of Architecture,
University of Florence, Via della
Mattonaia 8, 50121 Florence, Italy

Deadline for manuscript
submissions:

23 December 2024

Message from the Guest Editor

Increasingly, a country's land transformation activity depends on a complex system of national and local regulations; this is based on the discipline derived from the operating constraint system decided in various sector plans that have joint effectiveness and impose different levels of administrative verification. This complexity is mainly affected by those areas in between the urbanized and the natural—urban-rural interface and sprawl. However, these areas express the greatest potential for transformation to adapt cities to the change that the contemporary era imposes.

Such areas must be able to express functions capable of satisfying the increasing needs of residents, city users and tourists, ensuring proper reconnection between natural and urbanized systems; at the same time, land management processes of redevelopment/transformation of such areas must be characterized by administrative and temporal certainty, guaranteeing investors.

Special Issue

land

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and
Geography, Department
Sustainable Landscape
Development, University of Halle,
Von-Seckendorff-Platz 4, 06120
Halle, Germany

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
