Environmental Studies,
Stellenbosch University,
Stellenbosch 7600, South Africa

Dr. Zama Eric Mashimbye

Department of Geography &
Environmental Studies,
Stellenbosch University,
Stellenbosch 7600, South Africa

Deadline for manuscript
submissions:

15 July 2024

Message from the Guest Editors

Dear Colleagues,

We invite you to submit your papers for publication in this Special Issue of *Land*, “Land Degradation and Soil Mapping”. Land degradation is viewed as a major threat to ecosystem functions and services. Its adverse local effects, coupled with negative environmental and social impacts, pose significant challenges to communities at both the local and global levels. Predictive soil maps generated using geospatial techniques are considered as one of the most effective representations of specific features of soil conditions.

This Special Issue aims to publish high-quality scientific contributions regarding land degradation and soil mapping on a local, regional, or global scale. It will contain theoretical/methodological advances and operational and applied studies, covering many disciplinary fields. Research areas may include (but are not limited to) the following:

- Land degradation neutrality: mapping, measuring, and monitoring;
- Digital soil mapping;
- Desertification control;
- Land use optimization;
- Sustainable soil management practices.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
