

Water, Food and Energy Security in the Face of Human Disasters

Guest Editors:

Prof. Dr. Assefa M. Melesse

Department of Earth and
Environment, AHC-5-390, Florida
International University, 11200
SW 8th Street, Miami, FL, USA

Dr. Lulseged D. Tamene

International Center for Tropical
Agriculture (CIAT), Addis Ababa
P.O. Box 5689, Ethiopia

Dr. Berhan Gessesse Awoke

Ethiopian Space Science and
Technology Institute, Addis
Ababa, Ethiopia

Deadline for manuscript
submissions:

closed (15 May 2023)

Message from the Guest Editors

Water, food and energy demands are continuously increasing in the face of the changing climate and a growing population. There is an urgent need for immediate action to address these challenges and establish self-reliant food production. Unprecedented interrelated challenges have threatened our ability to meet the fundamental demands of human beings, including access to freshwater, food and energy. The changing climate, global warming and the uncertainty of rainfall regimes, and hence freshwater unavailability coupled with land and water degradation, exert an immense pressure on the efforts towards sustainable economic growth. Understanding the link between climate and land cover change dynamics, on the one hand, and water, energy and food security on the other, is a critical area of research. The roles of observation, data mining and modeling in this regard are tremendous. New sensors, satellite data and geospatial analysis provide important information needed to monitor and map areas where data is scarce. This Special Issue (SI) calls for submissions of reviews and research papers.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
