Sustainable Land Use through Balancing Human–Environment Relationships

Guest Editors:

Prof. Dr. Myounggu Kang

Department of Urban Planning and Design, University of Seoul, Seoul 02504, Republic of Korea

Dr. Klaas Kresse

Institute for Management Research, Department of Geography, Planning and Environment, Radboud University, Heyendaalseweg 141, 6500HK Nijmegen, The Netherlands

Dr. Jin Zhu

Faculty of Architecture, The University of Hong Kong, Pokfulam Road, Hong Kong

Deadline for manuscript submissions:

closed (29 February 2024)

Message from the Guest Editors

Dear Colleagues,

The United Nations defines sustainable land management as “the use of land resources, including soils, water, animals and plants, for the production of goods to meet changing human needs, while simultaneously ensuring the long-term productive potential of these resources and the maintenance of their environmental functions”. Unsustainable land use has significant negative impacts on the environment and society. As global populations grow and economies develop, the land required to meet human needs is likely to increase and the negative impacts are likely to worsen. Human land use plays a critical role in achieving international commitments for sustainable development.

For this Special Issue, we are interested in contributions that help us understand (1) the interactions among land use/cover, human activities, and climate; (2) the causes and impacts of (un)sustainable land use; (3) planning and policy for sustainable land use; and (4) emerging technology for managing and implementing sustainable land use, through either empirical research or conceptual/theoretical works.

We look forward to receiving your original research articles and reviews.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
