submissions:

30 November 2024

Message from the Guest Editor

Dear Colleagues,

Cities today face a host of challenges, many involving climate change, such as urban heat, wildfires, flooding, and other examples of extreme weather. Investing in trees and forests, and urban ecosystems generally, represents one of the most cost-effective and essential responses to these challenges, especially to rising urban heat.

The vision of canopy cities then understands trees and forests, and urban ecosystems generally, as essential elements of urban life. Canopy cities prioritize the protection and expansion of trees and forests and recognize the need to have trees and nature nearby and indeed all around us where we live. Trees and urban development are not antithetical to urban life but absolutely essential. This Special Issue hopes to discover and uncover new and exciting experiences and efforts around the world to protect existing trees and forests and to expand them and allow them to further. Canopy cities also recognize the need to engage and involve the public, to cultivate love and care for trees, and to reach a fair condition where all residents and all neighborhoods in the city experience trees and forests. We look forward to your contributions!

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
