Message from the Guest Editors

Dear Colleagues,

We are pleased to invite you to our Special Issue ‘The Impact of Rural Out-Migration on Land Use Transition’. In rural areas, agricultural production activities in which local residents have long been engaged have created a mosaic of various land uses, providing rich biodiversity, multifunctionality and ecosystem services. The Japanese term “satoyama” is now widely used internationally as a term to represent secondary nature. However, in both developed and developing countries, the low profitability and the hard physical labor of agriculture, as well as the lack of job opportunities other than agriculture have caused a population out-flow, especially among young people, raising concerns about the sustainability of agriculture and the decline of its indirect roles and services. While rural out-migration and land use transition in rural areas have been studied widely, it is important to know the mechanisms between them for practical solutions.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
