Deadline for manuscript
submissions:
closed (15 August 2019)

Message from the Guest Editors

Dear Colleagues,

This Special Issue seeks to assemble papers that advance our knowledge about the drivers and effects of land-use changes in South and Southeast Asia. We are interested in papers that provide new empirical evidence, review papers, and meta-analyses of, for example, case studies from the region. We are particularly interested in papers that look at the causes and effects of land-use changes from a multi- or interdisciplinary perspective, from a landscape level to a regional level. Papers that introduce novel methods of assessment of land-use changes, new ways of analyzing data, or new ways of ascribing drivers or effects to land-use changes are also welcome. Finally, we would like to encourage submission of solution-oriented studies. We do not encourage submission of papers reporting results of single local cases.

Assoc. Prof. Dr. Thilde Bech Bruun

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
