Biodiversity Investigation and Conservation in China: Current Status, Challenges, and Perspectives

Guest Editors:

Dr. Xinhai Li

Key Laboratory of Animal Ecology and Conservation Biology, Institute of Zoology, Chinese Academy of Sciences, Beijing 100101, China

Dr. Ning Li

College of Food Science, Nanjing Xiaozhuang University, Nanjing 211171, China

Dr. Erhu Gao

Academy of Inventory and Planning, National Forestry and Grassland Administration, Beijing 100714, China

Deadline for manuscript submissions:

closed (31 December 2023)

Message from the Guest Editors

Dear Colleagues,

We invite you to send your contributions to this Special Issue of *Land* entitled *Biodiversity Investigation and Conservation in China: Current Status, Challenges, and Perspectives*.

China is a fast-developing country; in the meantime, biodiversity conservation in China faces great challenges. In recent decades, the Chinese government has implemented numerous policies (e.g., logging bans) and initiated many projects (e.g., the Grain for Green program) for biodiversity conservation, both of which have substantially changed the status of conservation in China. On the other hand, rapid urbanization in China has also caused dramatic changes in many species. In short, many species and many communities have experienced massive decline or substantial recovery.

The aim of this issue is to show the status of and changes in biodiversity in China that have occurred across recent decades. We welcome studies about biodiversity surveys, population dynamics, community composition and changes, and biodiversity conservation and management on both the regional and national scales.

We look forward to receiving your contributions.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
