Influence on Soil Quality of Agriculture and Forest Management: Assessment, Mitigation and Best Management Practices

Guest Editors:

Dr. Francesco Latterini

Dr. Walter Stefanoni

Dr. Rachele Venanzi

Deadline for manuscript submissions:

closed (30 November 2022)

Message from the Guest Editors

Forestry and agriculture practices for non-food and food production have impacted both physico-chemical and worldwide. biological soil features In particular, inappropriate forest management and the exploitation of agricultural lands lead to a loss of fertility. soil quality, and soil resilience, which can jeopardize biodiversity, create hydrological concerns, and increase desertification. Hence, the current Special Issue aims to collect new insights into the influence that forestry and agriculture have on soil, and to gather best practices or new strategies to follow for improving the sustainability of both sectors.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
