Message from the Guest Editors

Dear Colleagues,

Land-change dynamics affect biodiversity and, in turn, human wellbeing at both societal and individual scales. Land-change dynamics are typically driven by short-term economic imperatives that rarely acknowledge their implications for biodiversity and/or human wellbeing. These implications are often somewhat removed from actual land-change dynamics or are otherwise unquantified. Human wellbeing, broadly defined, remains tenuously understood in relation to ongoing biodiversity losses driven by land change.

This Special Issue welcomes submissions that highlight the nexus of land change, biodiversity, and wellbeing with respect to its trends, compromises, and controversies. All article types are welcome, from full empirical studies to short research notes to commentaries and reviews.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
