### Message from the Guest Editors

We invite you to delve into the relationship between contemporary forms of landscape valuation and governance and current social media. Possible lines of research include current connections of social media with:

- Traditional ecological knowledge (TEK) and governance decentralization;
- Participatory scenario and land planning based on online technologies;
- Multi-scale processes and social–ecological resilience;
- Spatio–temporal patterns for the maintenance of the living landscape;
- Sustainable governance and rural landscape stewardship;
- User generated content (UGC) as a tool for landscape studies;
- Inclusive and participatory land governance—a cross-country comparison
