an Open Access Journal by MDPI

Land Use and Natural Resource Management

Guest Editors:

Dr. Eugene Ezebilo

National Research Institute, P.O.
Box 5854, Port Moresby, Papua
New Guinea

Dr. Patrice Savadogo

Institute of Environment and
Agricultural Research (INERA),
Ouagadougou BP 7047, Burkina
Faso

Deadline for manuscript
submissions:

closed (31 May 2022)

Message from the Guest Editors

Land is a life-supporting system which plays an important role in human wellbeing. However, lands have been continuously degraded as a result of anthropogenic activities such as deforestation, agriculture, mining and urbanisation. This degradation has an impact on the different dimensions of sustainable development (environmental, economic and social) and contributes to the loss of productivity and services provided by ecosystems (ecosystem services). A person's needs for the various types of ecosystem services (ES) often vary, and are differ from those of other people. Thus, if the use of one type of service is maximised it can result in the decline in the provision of other types of ES.

The aim of the Special Issue is to contribute to a greater understanding of:

- The complex relationships between land use and the provision of multiple ES and how it can be incorporated in natural resource management decisions.
- Strategies that can be used to manage conflicts of interest associated with different land uses.
- Ecosystem management strategies that can be used to consider both the supply and demand sides in the provision of ES.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and
Geography, Department
Sustainable Landscape
Development, University of Halle,
Von-Seckendorff-Platz 4, 06120
Halle, Germany

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
