Message from the Guest Editors

It is time to review what has and hasn't worked in planning, implementing, and financing functioning conservation landscapes that deliver both measurable conservation outcomes alongside critical goods and services for the local people that depend on them. Holistic, landscape-level planning approaches are needed to design the multifunctional, self-sustaining conservation landscapes that we need to address the key planetary challenges of our time.

We invite papers on the following topics:

Innovative approaches for planning and managing multifunctional conservation landscapes;
Holistic, landscape-level approaches to conservation planning and management;
Lessons learned from multi-stakeholder planning approaches and/or collaborative management approaches;
Examples of functioning conservation landscapes, including biosphere reserves, involving instruments such as PACAs, CCAs, TFCAs, ICCAs, and/or OECMs;
Strategies and examples for achieving long-term financial sustainability in conservation landscapes, including through sustainable wildlife economies; and
New tools and technologies to support multi-stakeholder planning approaches and/or collaborative management approaches.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
