## Sustainable Urbanism in the Era of Big Data: A Data-Driven Approach to Strategic Planning

Guest Editor:

**Dr. Simon Elias Bibri**

Department of Computer Science and Department of Planning and Architecture, Norwegian University of Science and Technology, 7491 Trondheim, Norway

Deadline for manuscript submissions:

**closed (10 April 2022)**

### Message from the Guest Editor

Sustainable urbanism is increasingly emphasizing the value of big data technology as a form of advanced ICT in improving and advancing sustainability.

The abundance of urban data, coupled with their analytical power, opens up new opportunities for innovative approaches to planning in sustainable cities. New sources of data coordinated with urban policy and management can be applied by following the fundamental principles of engineering science and applied science to achieve more effective solutions to the kind of wicked problems inherent in the planning of the existing models of sustainable urbanism, such as compact cities, eco-cities, green cities, environmental cities, and symbiotic cities. In addition, big data can be used as evidence base for formulating urban policies, plans, and strategies themselves, as well as for tracking their effectiveness and modeling and simulating future development projects.

This Special Issue of *Land* aims to offer a platform for enhancing research and practice in data-driven smart sustainable urbanism by bringing an informed understanding of the subject to scholars, policymakers, practitioners, and futurists.

### Prof. Dr. Christine Fürst

Institute for Geosciences and  
Geography, Department  
Sustainable Landscape  
Development, University of Halle,  
Von-Seckendorff-Platz 4, 06120  
Halle, Germany

## Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
