

## Special Issue

# Human–Nature Relations in Urban Landscape Planning

### Message from the Guest Editors

The role that current urbanization processes play in increasing the pressure on the planetary system requires a fundamental rethink of the way cities are planned, designed, and developed. The current planning of urban landscapes is dominated by a human-centric view. This often leads to the planning being orientated toward the short term, predictable planning outcomes based on recent history, and decisions being taken by a small group of human decision-makers. Alternatively, a symbiotic human–nature relationship could be the prelude to a balanced future in which sustaining human and non-human organisms prevails. This Special Issue asks for novel research that focuses on the use of landscape and local and regional ecosystems, and uses the ecological landscape as a determinant for how human and urban activities function, are laid out, are planned for, and are designed. Such a resilient (urban) ecosystem is paramount for further urban development, and therefore it creates the spatial conditions for the urban landscape to function in its most natural way. We look forward to receiving your original research articles and reviews.

### Guest Editors

Prof. Dr. Rob Roggema

1. Escuela de Arquitectura, Artes y Diseño, Tecnológico de Monterrey, Monterrey 64849, Mexico
2. Cittaideale, Herenstraat 26A, 6701DL Wageningen, The Netherlands

Dr. Nico Tillie

Faculty of Architecture, Delft University of Technology, 2628BL Delft, The Netherlands

### Deadline for manuscript submissions

31 May 2025

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
