

Special Issue

Resilient Landscapes for Sustainable Trade and Development

Message from the Guest Editors

Through this Special Issue, we propose to explore the progress that has been made since the publication on resilient multifunctional landscapes by Minang et al. (2015), in terms of vertical and horizontal integration between value chains and landscapes and how this affects the resilience of the landscape; the contribution of different governance initiatives to making landscapes more resilient to climate and other shocks; as well as in terms of progress in co-investments for resilient landscapes. We propose three sections, each led by an invited review paper and followed by research papers related to the section's topic: 1) Integrating resilient landscape approaches with agro-commodity value chains and development 2) Governance challenges and strategies for reconciling landscape resilience with trade and development 3) Finance and investment challenges and emerging opportunities for mainstreaming resilience into landscapes Authors are free to submit their papers to our SI once the papers meet the scope of any of these sections.

Guest Editors

Dr. Bas Louman

Dr. Sara Scherr

Dr. Vincent Gitz

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
