

Special Issue

Sustainable Urban Planning Models for New Smart Cities and Effective Management of Land Take Dynamics

Message from the Guest Editors

In this Special Issue, original research articles and reviews are welcome. The aim is to collect innovative scientific contributions on the assessment and evaluation frameworks concerning, but not limited to: indicators and indices based systems, real estate evaluation models, geographic information systems, urban planning compensation schemes and financial operative tools that can support the decision processes that occur during public–private partnerships in the determination of the economic-financial, social and environmental risks related to land consumption reduction.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
