

Special Issue

Land Use Planning for Natural Hazards

Message from the Guest Editors

Natural hazards are physical phenomena that occur worldwide and contribute to the evolution of the Earth's landscape. Their associated consequences can lead to damage to both the natural and man-made environment. On a global scale, overpopulation and urban development in areas prone to natural hazards increase the impact of natural disasters. In order to minimize the loss of human life and reduce the economic consequences, proper planning, and management of natural disasters are essential. However, consideration of the natural hazards and their influence on landscape evolution during the land use planning stage is essential in natural hazard mitigation and urban disaster management. This Special Issue invites papers dealing with the interactions of natural hazards, human activities and land uses. Papers that address Natural Hazard Assessment Mapping and Land Uses are welcome.

Guest Editors

Dr. George D. Bathrellos

Department of Geography and Climatology, Faculty of Geology and Geoenvironment, National and Kapodistrian University of Athens, ZC 15784 Athens, Greece

Dr. Hariklia D. Skilodimou

Department of Geology, University of Patras, ZC 26504 Patras, Greece

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
