Urban and Regional Planning in Post-socialist Countries

Message from the Guest Editors

Urban and regional planning in post-socialist countries during the period after the political transformation is going through a difficult evolution. On the one hand, entry into the structures of the European Union and huge infrastructure investments and development programs related to cohesion policy are resulting in far-reaching changes in the spatial structures of each country, region, and urban center. On the other hand, the new development conditions did not stop the spontaneous processes of urbanization and deurbanization in urban agglomerations. Depopulation has occurred in many regions, especially peripheral ones, in addition to accelerated suburbanization, visible not only near large urban centers. Studies and texts on both countries and regions or selected urban systems could give a picture of the situation in the field of spatial development in the group of post-socialist countries.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
